

Based on the given design, the following UI sections are needed for the "Home" page:

1. Top Navbar:

- The top navbar should contain the app name "ClickMe" on the left side.
- On the right side of the navbar, there should be a search bar where users can search for photographers by name, location, or specialty.

2. Hero Section:

- The hero section should contain a background image of a photographer taking a photo.
- On top of the background image, there should be a headline that says "Find Photographers Near You".
- Below the headline, there should be a subheadline that says "Book a photographer for your next event or project".

3. Categories Section:

- The categories section should contain a list of categories that users can choose from to find photographers.
- Each category should have an icon and a label.
- The categories should include: Wedding, Portrait, Event, Landscape, and Commercial.

4. Featured Photographers Section:

- The featured photographers section should contain a list of photographers that are currently featured on the app.
- Each photographer should have a profile picture, name, location, and hourly rate.
- Users should be able to click on a photographer to view their full profile.

5. Testimonials Section:

- The testimonials section should contain a list of testimonials from satisfied customers.
- Each testimonial should have a profile picture, name, and a quote.
- Users should be able to click on a testimonial to view the full review.

6. How It Works Section:

- The how it works section should contain a step-by-step guide on how to use the app.
- Each step should have an icon and a label.
- The steps should include: Search for photographers, View photographer profiles, Book a photographer, and Enjoy your event or project.

7. Footer or Bottom Navbar:

- The footer or bottom navbar should contain icons for Home, Favorites, Profile, and Settings.
- The Home icon should be highlighted to indicate that the user is currently on the home page.
- The Favorites icon should allow users to view their favorite photographers.
- The Profile icon should allow users to view and edit their own profile.
- The Settings icon should allow users to adjust their app settings, such as notifications and privacy.
